## BeBop Garden: riffing and jiving in the plant kingdom a different kind of gardening book by Ricki Grady

*This is not your run-of-the-mill how-to. Ricki isn't bossy. She dishes modest nuggets of advice with ample explanation, honed from years of experience. And when you combine her experience with her writer's heart, the results are stories to enjoy: the wanderings of garden cats, the peril of a goldfish, ladybugs crawling all over the inside of a refrigerator, a grandson dancing with a squirrel and so much more.*

~ Grace Pete

*Just the right book to curl up with in the garden on a sunny afternoon... the kind of easy banter you have with a good gardening friend.*

~ Loree Boh

Ricki Grady's *BeBop Garden* (\$14.95) is a book about gardening in the same sense that Izaak Walton's *The Compleat Angler* is a book about fly fishing. Or that Laurie Colwin's *Home Cooking* is a book about food.

If this book really were a jazz composition, it would be a clever, brightly syncopated tune by Dave Brubek—there's a lot of bright and shiny to delight the ear, but this is a kind of storytelling that can change the way

you see the world at a molecular level. While *BeBop Garden* is about how to grow plants, it's also about how to grow your heart and mind, how to find your improvisational center and learn to trust your instincts when it comes to discovering paths through life that will consistently delight and surprise you.

*Dymaxicon will be launching BeBop Garden at Portland's Wordstock Festival October 6-9, with book signings and author appearances to follow.
